Plettenberg Bay

Endless Summer

"Wow what an amazing summer of diving we had!

Visibility ranged between 8 - 15m inside the bay with top to bottom on some of our deeper sites. Water temperatures seldom dropped below 21 deg C and Redbait reef was abundant with tropical fish such as goatfish, black edged butterfly fish and coachmen.

Our new dive sites lived up to expectations and a trip to Sharkpits delivered seven ragged tooth shark in one spot. They even sighted a whale shark on their way back!

Although most of the land based visitors have left, their tropical counterparts can still be seen on our reefs so phone us on 044 533 1158 or email plett@prodiver.co.za to make a booking now!
