

Wildfire risk to your home and your community

We would like to invite you to an information sharing session
18:00 on Friday, 7 Sept 2018
and a FREE training session 9h30-15h30, 8 Sept 2018
at the Brenton Hall

LANDWORKS™ has been appointed to run a public awareness campaign in the greater Knysna area, due to the devastating wildfires of 2017. Much of the landscape remains unburnt and poses a risk of further wildfires.

The purpose of the meeting is to help you understand the risk that you and your neighbours face from wildfire and to provide life-saving information that you and your community will find useful to protect yourself, your family and your home from wildfire.

The FREE training session on the Saturday will be a step by step risk assessment and reduction course that you can use for your property and community in order to practically analyse and reduce your risk.

Please share this open invitation with your neighbours, colleagues, friends, and members of your community. Everyone is welcome to attend.

Please contact me on Whatsapp, SMS or email (details below) so that I can estimate the number of people attending as we would like to serve everyone who attends with refreshments.

Remember: “Fire is everyone’s fight.”
